So I thought this would be a huge plus, but it seems the drivers aren't available for Macs. Can anyone recommend an alternative? I'm looking to get some photographs taken from an iPhone for a report. Thanks! A: Check out this Zoomy handheld digital microscope. Zoomy Handheld Digital Microscope is a handheld zoom microscope (microscope). This handheld digital microscope is compatible with both PC and Mac. It features 4x, 10x, 20x, 50x, 60x and 100x magnification. Its USB interface allows you to plug it directly into your computer and use the software. It comes with a user guide. Built-in software: The USB interface has a built-in software called Zoomy, which provides you with an user friendly interface. It allows you to take photographs, record audio and even access an attached USB camera and video camcorder. To download, click the download link below: Zoomy Handheld Digital Microscope Q: Last.fm API v2 - Get artists who played a song (arguments) Is there a way to get the artist of a song with the Last.fm API v2? The documentation says something about arguments, but I don't know which exactly. A: The easiest way to find an artist that plays a song is to

---

listen for played on track events. You'll need to use the event attribute to find out the artist. If you look at the parameters, you'll see a play\_event parameter which returns information about the event. API 1 This returns the artist and title of the track that was played. API 2 This returns more information including the time and track information. API 3
