Harif The Wolf Of Wall Street 2013 720p Hindi DVDSCR Rip X264Q: Android: How to create and setup a change listener for the whole package in an onCreate method? I am developing an Android app. I have created a method in my Activity to load configuration for the application. Now I need to use the information of the loaded configuration in the whole app, to let the user know when configuration changes. I have read the developer guide several times and here is the point where I don't get it right. I tried with this: this.getPackageManager().registerActivityLocked(new PackageMonitor(), MyActivity.class.getName()); Then in the Activity I have: private static final OnPackageInstallListener mListener = new OnPackageInstallListener() { @Override public void onPackageInstall(PackageInstallInfo info) { Log.i(TAG, "Listener registered"); } }; @Override protected void onCreate(Bundle savedInstanceState) { super.onCreate(savedInstanceState); if (ActivityCompat.checkSelfPermission(this, Manifest.permission.WRITE_SETTINGS) != PackageManager.PERMISSION_GRANTED) { ActivityCompat.requestPermissions(this, new String[]{Manifest.permission.WRITE_SETTINGS}, 1); return; } this.getPackageManager().registerActivityLocked(mListener, get 6d1f23a050
